Should Schools Ban Mobile Phones?

A. ____ Some people think phones are distracting.

B. ____ Many students today have mobile phones.

Some schools and countries think students should not use them during the school day. They have made strict rules. Phones are not allowed in class or sometimes even at school. But why are these rules needed? Let's look at the reasons for and against using phones in school.

C. ____ In the end, there are good and bad sides to using phones in school.

They can help students with learning or contacting parents, but they can also distract from studying. Some students might also use phones unfairly in exams. Schools and countries need to think carefully about both the pros and cons. What do you think? Should phones be banned in schools?

D. ___ Phones can be useful in some ways.

Japanese car maker Nissan has developed a new type of paint that keeps cars cooler. The paint lowers the temperature inside cars that are parked in sunlight. The paint can keep a car 12°C cooler than cars with regular paint. The new paint will also reduce the need for air conditioning. This means there is less pressure on a car's battery. Nissan said: "The project is part of [our] pursuit of...innovations that empower journeys, and help create a cleaner, more sustainable society." The paint is currently only available in white. Nissan hopes to make other colours in the future.

A trip around the USA

Read the text about travelling around the USA and for questions 1 to 7, decide if the sentences are true or false.

A trip around the USA

Dear Family,

Everything has been so much fun here in the US. I am sorry that it has taken me so long to write. When we arrived yesterday, we immediately went to our hotel in New York City, took showers, and began our sightseeing trip! We saw the Statue of Liberty, Wall Street, and Times Square, all in just one day.

Unfortunately, we could only spend that one day in New York because we had to take the train to see the Niagara Falls. I am riding the train now as I write. We should arrive in a few hours. I think we'll go straight to bed as it will be past midnight when we arrive.

After Niagara Falls, we're going to visit Toronto in Canada as it is only a little further north. I've never been to Canada, so that will be exciting. From Toronto, we're going to take a flight to Los Angeles. That's where we're going to stay for the rest of the trip. I think Sam wants to go to Disneyland, so I'm sure we'll do that. And of course, we're going to surf in the Pacific Ocean!

I will try to write again soon, but we are doing so much that I can't make any promises. Take care.

We love you both,
Francis and Sam

Famous people's first jobs –

Read the text about three famous people's first jobs and fill in the gaps with the right word..

bouncer , wave , parlour , path , responsibility , weird , rest

Famous people's first jobs

Not all famous people were born into famous families. A lot of them had normal lives before becoming famous. They also had jobs like the of us. Here are just a few:

Former President Obama worked at an ice-cream selling ice-cream cones. He was in high school in Honolulu, Hawaii and said it was quite hard. He also said that the job taught him about, hard work and how to spend time with work, friends and family.

Brad Pitt had a job when he was younger. He worked as a chicken! That's right. He worked at a restaurant called El Pollo Loco in Hollywood, and his job was to dress up like a chicken and at the cars on the road. In fact, if you go on a "See the Stars" tour in Hollywood, many of them will take you past the same restaurant where Brad used to work.

Maybe the strangest in life was that of Pope Francis. When he was young in Argentina, he worked several jobs before joining the Jesuits and dedicating his life to

religion. He worked as a cleaner sweeping floors, a chemical tester at a laboratory and as a at a bar! Yes, the pope was the person responsible for security at a bar in case anything wrong happened. Can you imagine?!

Going to the mall

Read the text about travelling around the USA and for questions 1 to 6, choose the correct answer.

Going to the Mall

Every city in the USA has a mall or four. There are about 1,100 malls in the US. These giant store-filled buildings are one of America's greatest entertainment options for teens and families.

Mall of America in Minnesota is the largest mall. It is so big that it has an amusement park in it, Nickelodeon Universe, with several roller coasters! There are more than 500 stores in it, about 400,000m² and about 12,000 people work there.

But malls nowadays aren't the same as they used to be in the 80s and 90s. During those decades, teens would go to the mall and spend hours shopping, playing video games at the arcade, or just hanging out with friends. It was cool in the summer and warm in the winter. In those days, malls provided the perfect source of shopping and entertainment for entire families.

Nowadays, you can still eat in the food court and go to the movies, but there aren't many arcades left. Millennials have their Xboxes or Ps4s, and they like shopping online, which is also happening with more and more people from other generations. And as more people shop online and play video games at home, fewer people go to the mall to hang out.

Hopefully, malls will remain one of the great American pastimes. But only time will tell how people in the future will prefer to spend their time.

Reading Comprehension_01:

How to be a Safe and Smart Searcher

Read the text carefully and answer the following True or False questions.

Several keywords will help to find better results. Use more than one keyword when you are doing a search. If you want to find out about seagulls, for example, search for 'bird seagull' and not just 'seagull' – because seagull might also be the name of just about anything else, from a hotel to a documentary film.

Exact references can help you find what you're looking for. If you are looking for an exact phrase or sentence, e.g., "seagulls are very clever", type it between inverted commas ("") and only exact matches will be shown. This is useful when you want to find something you've already seen but lost.

Avoid common words like 'a' or 'the' in a search. These aren't always helpful and are usually unnecessary.

Remove unwanted results by adding a minus symbol (-). For example, 'seagull - hotel -film' would leave out all references to hotels and films.

Check your spelling. Make sure that you spell every word in the search box correctly. The smallest typing mistakes can bring unwanted results – especially when the mistyped word exists.

Have a filter. It's a good idea to filter your online searches, especially when you are searching for pictures. Ask an adult to help you add a filtering system. There are lots of filtering software options available.

Experiment with different search engines until you find the one that's best for you. Some search engines personalise the results, so check out the option of using a search engine that doesn't do this and you will get different results.

Reliability is very important when you are searching on the internet. Always ask yourself, 'Is this reliable?' Don't make the mistake of believing everything you see. Some websites are unreliable and some information is false. Check your information on other websites before accepting it.

True or False Questions

1. Using only one keyword in a search will give you the best results. ____
2. To find an exact phrase, you should put it inside inverted commas ("). ____
3. Common words like "a" and "the" should be included in all searches. ____
4. Adding a minus symbol (-) before a word will include that word in your search results. ____
5. Correct spelling is important to get accurate search results. ____
6. It's not necessary to use filters when searching for images. ____
7. You should try different search engines to see which gives the best results. ____
8. All websites are reliable sources of information. ____
9. You should always check information on other websites before accepting it. ____
10. The text suggests that spelling mistakes don't affect search results. ____
